

Oxygen Forensic

Suite 2

Oxygen Forensic Suite 2 is PC software designed to extract the maximum information from cell phones, smartphones and other mobile devices for forensic purposes.

This software played a significant role in criminal and other investigations all over the world.

Oxygen Forensic Suite 2 – Premium Mobile Examination.

Brief information:

- **Oxygen Forensic Suite is widely used all over the world.** Among our clients there are Law Enforcement units, Police Departments, army, customs and tax services, and other government authorities. Since 2002 Oxygen Forensic has been successfully used in more than 50 countries over the world, including the USA, Great Britain, Germany, Netherlands, Australia, Sweden, Denmark, Norway, Finland and others.
- **Mobile devices information is of great value nowadays.** Cell phones, smartphones and other mobile devices play significant role in our life. People store a lot of important information there: telephone numbers, addresses, photos, e-mails, notes, messages, calls history, voice records, videos etc. The growth of the data amount stored in mobile devices makes the fast, convenient and thorough data analysis much more important.
- **Besides the general data extracted by similar products, Oxygen Forensic Suite can extract a lot of unique information.** Using low-level protocols allows the program to extract: phone basic information and SIM-card data, contacts list, caller groups, speed dials, missed/outgoing/incoming calls, standard SMS/MMS/E-mail folders, custom SMS/MMS/E-mail folders, deleted SMS messages (with some restrictions), SMS Center timestamps, calendar events schedule, tasks, text notes, photos, videos, sounds, LifeBlog data (all main phone events with their geographical coordinates), Java applications, file system from phone memory and flash card, GPRS and Wi-Fi activity, voice records and much more. The list of supported features depends on a certain phone model.
- **Strong support for smartphones and communicators.** The future of cell phone market is smartphones. Oxygen Forensic Suite supports Symbian OS, Nokia S60, Sony Ericsson UIQ, Windows Mobile 5/6 and Blackberry smartphones.
- **More than 800 mobile device models are supported. And the list is rapidly growing!** Oxygen Forensic Suite extracts data from Nokia, Vertu, Sony Ericsson, Samsung, Motorola, Blackberry, Panasonic, Siemens, HTC, HP, E-Ten, Gigabyte, i-Mate and other mobile phones.
- **Convenient analysis and data export, reports generation.** Software interface is specially designed for forensic analysis, data search and reporting. Oxygen Forensic Suite can either print reports or export them to the most popular file formats.
- **Guarantee of the data invariability.** Oxygen Forensic Suite guarantees the analyzed mobile phone data invariability while accessing it from the program.
- **All national symbols support.** Oxygen Forensic Suite has a full support of Unicode standard. So the multilanguage information is read and shown correctly.
- **Oxygen Forensic Viewer – a special utility for remote analysis.** If you need to send the extracted information outside, e.g. for analysis by remote experts, your colleagues can have the data presented in the same convenient interface as yours. Oxygen Forensic Viewer is special view-only software for remote analysis of mobile phones data.
