

FOR IMMEDIATE RELEASE

Alexandria, VA – April 16, 2019 – Today, Oxygen Forensics, a leading global provider of digital forensic investigation software to law enforcement, government and enterprise organizations, announced the hire of digital forensics expert, Keith Lockhart as its Director of Training.

Lockhart previously served as Vice President of Strategic Programs for AccessData Group for 15 years, leading digital forensics training solutions for Local, State, Federal and International Law Enforcement agencies as well as worldwide corporate entities and law-firms involved in the prevention, investigation, and prosecution of high-technology crime.

“We are thrilled to welcome Keith, a former law enforcement officer and expert in the digital forensics industry to Oxygen Forensics as our new Director of Training,” says **Lee Reiber, COO of Oxygen Forensics**. “Keith is a world-renowned trainer, bringing two decades of experience in digital forensics, e-Discovery, decryption, incident response, mobile device collection, and analysis to the company. His stellar background in training and bold ideas for the future will ensure that Oxygen Forensics clients have the best curriculum and resources in the industry for years to come.”

Lockhart is a member of the High Technology Crime Investigation Association (HTCIA) and has served as the Director of Training and President for the International Association of Computer Investigative Specialists (IACIS) – from which he obtained Certification as a Forensic Computer Examiner. He has instructed at the FBI National Academy, the United States Secret Service, the Dutch National Police Academy, the National Center for Police Excellence in the United Kingdom, the London Metropolitan Police Anti-Terrorist Branch, the Canadian Police College, Australian Federal Police Headquarters and presents regularly for numerous law enforcement agencies and public / private sector organizations around the world.

“I am proud to join Oxygen Forensics as it continues keeping the world safe by providing law enforcement, federal and corporate clients’ with cutting edge solutions to their toughest digital forensics needs,” says **Keith Lockhart, Oxygen Forensics’ incoming Director of Training** “As a former law enforcement officer, I know first hand the value add that Oxygen Forensics products bring to law enforcement officers across the country. This company is at the forefront of the mobile data forensics industry and it is my honor to join it as we transition to the next phase of mobile and data innovation.”

As Oxygen Forensics Director of Training, Lockhart will be responsible for building a forward-looking training program for the company’s wide array of law enforcement, federal and corporate clients. He will be tasked with ensuring the company's training infrastructure remains ahead of technologies and trends in the market.
